

Update your project page

CreaTech Showcase 2026 | Where Code Becomes Culture

Prefer a visual guide? Follow the screenshots and numbered callouts on pages 4-7. Pages 1-3 explain the steps and content requirements.

Please complete your page and submit it for review by 29 September 2026, ahead of our 30 September meetup. This is a soft deadline: you can still access and edit your page afterwards.

Help visitors understand your work and what they can experience at the showcase. Review the draft already assigned to you, add your public-facing text and image, then send it to the organiser for review.

Your simple route: sign in > edit > Save draft > Preview > Submit for review. Saving or submitting does not put your changes online.

1. Get ready

Have your invited email account open, your project text, and an image you have permission to use. The image can be PNG, JPEG or WebP, up to 5 MB. Convert an iPhone HEIC image before uploading. You can save an unfinished draft.

2. Open your workspace

<https://createch-showcase-staging.pages.dev/participant/>

Wait until the organiser has sent your invitation. If a separate access screen appears before the participant sign-in page, use your invited email and follow that screen first. Its access code is separate from your participant invitation code.

3. Sign in for the first time

Enter your invited email address. Tick "This is my first invitation code", paste the code from your invitation into "Email code", then choose "Verify code". Use that invitation code before requesting an ordinary sign-in code. Keep all codes private.

Returning later? Leave the first-invitation box unticked, choose "Send email code", then enter the new code and choose "Verify code".

4. Choose your project

Under Your projects, choose "Edit project". Check that the project belongs to you. If it is missing or incorrect, contact the organiser before editing.

What to include

Write for a curious visitor who may be new to your subject.

Your work

Project title (120 characters): the title visitors should see.

Public contributor name (100): your preferred public name or collaboration credit.

Short invitation (200): one clear sentence about what visitors can discover.

About the work (2,000): explain the idea, what the work is and why it matters. Define unfamiliar terms.

Main image

Choose one image that represents the work. Add **Image alternative text** (300 characters) describing what is visible, and **Image credit** (200) naming the photographer, creator or rights holder as appropriate. Do not use an image you cannot give permission to display.

For example, alternative text might read: "A visitor moves their hand above a sensor while coloured shapes appear on a screen." Use a description of your actual image.

Visitor experience

What visitors can do (700 characters): describe the experience in practical terms. Choose the applicable encounter labels: **Look / listen**, **Participate**, or both. Use **Proposed access or sensory correction** for work-related information the organiser should review, such as sound or flashing imagery.

Optional links and detail

Add up to three labelled links, a public video link, and a short **Behind the work** note (800 characters) if useful. Link addresses must begin with <https://>. Use public destinations that visitors can open.

Keep personal contact details, equipment requests, installation logistics and your own access needs out of public-profile text. Send these separately to the organiser. Project location, timing, theme and confirmed access information are organiser-controlled.

The limits above are characters, including spaces, not word counts. Aim for clear, concise text rather than filling every field.

Save, check and submit

5. Save your draft

Choose **Save draft** and wait for a successful save message before leaving the page. If the editor offers automatic saving, still check that the latest changes have been saved. Uploading an image alone is not a completed submission.

6. Preview and review

Choose **Preview**. Check the title, spelling, contributor credit, image, alternative text and links. Confirm that a visitor can understand what they will see or do. Return to editing to correct anything, then save again.

7. Send it for review

Read and tick the permission declaration only if you have permission to submit the text and image for public display. Save the draft, then choose **Submit for review**. Open **View this submitted version** or **View submitted version** to check progress and any feedback.

Draft = private saved work. Submitted = that version is awaiting checks/review. Approved = awaiting a separate publication step. Published = the public release has been verified. An existing public page stays unchanged while later edits are pending.

Need to change something afterwards?

Edit your draft, save it and submit the updated version for review. Changes made after a submission do not update that submitted version automatically. Follow any organiser feedback shown under Your projects.

If something goes wrong

No invitation, expired first code or access denied: contact the organiser. Check your invited address and spam folder; do not share codes.

Save failed: keep the tab open, follow any sign-in prompt and try Save draft again. Unsaved text can be lost when you close the tab.

A newer draft exists: compare it before reloading; reloading discards your unsaved text.

Checks are queued or failed: open the submitted version, read the message, and use Retry checks if offered for a delivery failure. Do not submit duplicate copies just to retry delivery.

Need help? Email timothiellim@gmail.com. Include your project title and the error message, but never a sign-in code. If you need longer than 29 September, let the organiser know; editing stays available.

Sign in: follow the numbers

Screenshots show a sample project in the local test workspace. Your project and some styling may differ; use the labelled controls. No real participant data or sign-in codes are shown.

Sign in to your workspace

Use the email address invited by the organiser. Visitors can browse without signing in.

Invited email address

1

Send email code

Already have an invitation code? Enter it below without requesting another code.

2

☒ **This is my first invitation code**

Email code

3

Paste the code from your email. A code request does not confirm delivery.

4

Verify code

Closing this tab may require you to sign in again. Unsaved text is kept only while this page remains open.

[Participant help](#) ↗

Need a hand? timothiellim@gmail.com

1 Enter your invited email. **2** Tick the first-invitation box for your first visit. **3** Enter the code from your invitation. **4** Choose Verify code.

First visit: do not choose Send email code before verifying the invitation code. Returning visits: leave the box unticked and request a fresh email code. Any outer access screen is a separate step; it is not pictured here.

Choose your project and edit

Synthetic test work

Draft

No verified public version yet.

1

Edit project ↗

1 Choose Edit project for your assigned work. The project name here is an example; check that your own assignment is correct.

Your work

You can save an unfinished draft. Complete the required fields before submitting for review.

Project title

2

Sample project - demonstration only

Required to submit. 35 of 120 characters

Public contributor name

Sample contributor

Required to submit. 18 of 100 characters

Short invitation

3

Explore how simple shapes can change the way we see an image.

Required to submit. 61 of 200 characters

2 Check your title and public contributor name. **3** Write a short invitation. Continue down to About the work and Visitor experience; the upper part of the form is shown here.

Add your main image

Main image

Choose a main image

1

No file chosen

PNG, JPEG or WebP, up to 5 MB. Convert HEIC before uploading. Uploading does not approve an image.

No image selected.

Remove image from draft

Image alternative text

2

0 of 300 characters

Image credit

3

0 of 200 characters

Draft saved. Your public page has not changed.

1 Choose your image file. **2** Describe what the image shows in Image alternative text. **3** Add the image credit. This example is shown before choosing a file.

Use PNG, JPEG or WebP, up to 5 MB. Only use an image you have permission to display. After uploading, save the draft; the image still needs checks and review.

Preview, submit and follow up

1 Save draft and wait for confirmation. 2 Preview your page. 3 After checking your content, accepting the permission declaration and saving, choose Submit for review.

The top of Preview is shown here. It is private and not submitted. Use Back to editing for corrections. Submission happens from the editor, not from Preview.

After submitting, open View this submitted version. The example shows Checks queued. Use Refresh status for progress, or Retry checks for a delivery problem. It is not a publication confirmation.
