

Sign in with your email

Complete your page by 29 September 2026, before the 30 September meetup. This is a soft deadline; you can still edit afterwards.

Open the website below and choose the participant workspace. Use the email address that received your organiser invitation.

<https://createch-showcase.pages.dev/participants/>

A screenshot of a web page titled "Sign in to your CreaTech page". The page has a light gray background. At the top, the title "Sign in to your CreaTech page" is in a bold, dark font. Below it, a paragraph says "Use the email address invited by the organiser. Visitors can browse without signing in." Then, there is a section labeled "Email address" in bold. Below this label is a text input field with a light gray background and a thin blue border, containing the text "synthetic@example.invalid". Below the input field, a smaller line of text says "Use the email address where you received your invitation." Below that is a large, solid blue button with the white text "Email me a code". Under the button, there is a link that says "I already have a code" in a dark font. Further down, a paragraph states "Closing this tab may require you to sign in again. Unsaved text is kept only while this page remains open." At the bottom, there is a link "Participant help" with a small blue arrow icon, and below that, the text "Need a hand? [timothiellim@gmail.com](\"mailto:timothiellim@gmail.com\")".

Sign in to your CreaTech page

Use the email address invited by the organiser. Visitors can browse without signing in.

Email address

synthetic@example.invalid

Use the email address where you received your invitation.

Email me a code

[I already have a code](#)

Closing this tab may require you to sign in again. Unsaved text is kept only while this page remains open.

[Participant help](#) ↗

Need a hand? timothiellim@gmail.com

Enter your **Email address** and choose **Email me a code**. If you already have an unused code, choose **I already have a code** instead. This does not send or replace a code.

This visual walkthrough matches each screenshot to its step. Screenshots use sample content in a local test workspace, with no real account or code shown.

Enter your six-digit code

Open the latest CreaTech email, then return to the sign-in page. Check your spam folder if the email has not arrived.

Sign in to your CreaTech page

Use the email address invited by the organiser. Visitors can browse without signing in.

Check your email

synthetic@example.invalid

Email code

Use the latest six-digit code. It expires 24 hours after it was sent. You can request a new code when needed.

Continue

[Send a new code in 60s](#) [Change email](#)

Closing this tab may require you to sign in again. Unsaved text is kept only while this page remains open.

[Participant help](#)

Need a hand? timothiellim@gmail.com

Enter the **Email code** and choose **Continue**. The same steps work for your first invitation and later visits.

A code expires **24 hours after it was sent**. It can be used once. A replacement code makes the previous code unusable.

Expired or missing code? Choose **Send a new code** when the countdown finishes. You can request a replacement before the old code expires. Use **Change email** to correct an address.

Your assigned project usually opens automatically. If you have several projects, choose the one you want to edit. Keep codes private. Closing this tab may require you to sign in again.

Choose your project and write

2. Choose your assigned project

Synthetic test work

Draft

No verified public version yet.

A [Edit project](#) ↗

A If a project list appears, choose **Edit project**. Check that the work belongs to you. If it is missing or incorrect, contact the organiser before editing.

3. Tell visitors about your work

Your work

You can save an unfinished draft. Complete the required fields before submitting for review.

Project title

B Sample project - demonstration only

Required to submit. 35 of 120 characters

Public contributor name

Sample contributor

Required to submit. 18 of 100 characters

Short invitation

C Explore how simple shapes can change the way we see an image.

Required to submit. 61 of 200 characters

B Check your **Project title** (120 characters) and **Public contributor name** (100). Use the title and name or collaboration credit you want visitors to see.

C Write a **Short invitation** (200): one clear sentence about what visitors can discover. In **About the work** (2,000), explain the idea, what the work is and why it matters. Define unfamiliar terms.

Write for a curious visitor who may be new to your subject. Limits are characters including spaces, not word counts. You can save an unfinished draft.

Add your main image

Choose one image that represents your work and that you have permission to display. Use PNG, JPEG or WebP, up to 5 MB. Convert an iPhone HEIC image before uploading.

Main image

Choose a main image

A Choose File No file chosen

PNG, JPEG or WebP, up to 5 MB. Convert HEIC before uploading. Uploading does not approve an image.

No image selected.

Remove image from draft

Image alternative text

B

0 of 300 characters

Image credit

C

0 of 200 characters

Draft saved. Your public page has not changed.

A Choose the image file. The screenshot shows the form before a file has been chosen. After uploading, save your draft; uploading alone does not submit it.

B Add **Image alternative text** (300 characters): describe what is visible for someone who cannot see it. For example: "A visitor moves their hand above a sensor while coloured shapes appear on a screen." Describe your actual image.

C Add **Image credit** (200 characters), naming the photographer, creator or rights holder as appropriate.

Only use text and images you have permission to submit for public display. The organiser checks the submitted version before publication.

Explain the visit, save and preview

5. Complete the visitor experience

Continue down the editor to **Visitor experience** (not pictured below). In **What visitors can do** (700 characters), describe the experience in practical terms. Select **Look / listen**, **Participate**, or both, as appropriate.

Use **Proposed access or sensory correction** for work-related information the organiser should review, such as sound or flashing imagery. Optional: add up to three labelled <https://> links, a public video link and a **Behind the work** note (800 characters).

Keep personal contact details, equipment requests, installation logistics and your own access needs in separate organiser correspondence. Location, timing, theme and confirmed access information are organiser-controlled.

6. Save your draft and check Preview

A Choose **Save draft** and wait for confirmation. Draft changes also save automatically after a short pause; check that the latest changes have saved before leaving. **B** Choose **Preview**.

The top of Preview is shown above. Check the title, spelling, contributor credit, image, alternative text and links. Can a visitor understand what they will see or do? Use **Back to editing** for corrections, then save again.

Preview is private. It does not submit or publish your page. The Submit for review button (C in the first screenshot) is the next step.

Submit and check the result

In the editor, read the permission declaration and tick it only if you have permission to submit the text and image for public display. Choose **Save draft** (A), wait for confirmation, then choose **Submit for review** (C).

After submitting, open **View this submitted version** or **View submitted version**. This lets you see progress and any organiser feedback.

This example shows **Checks queued**. Choose **Refresh status** to see progress. If a delivery problem is reported and **Retry checks** is offered, use it. Do not submit duplicate copies just to retry delivery.

Saving is not submitting. Submitting is not publishing.

The organiser reviews your submitted version before it goes live. An existing public page stays unchanged while later edits are pending.

Need to change something afterwards?

Edit your draft, save it and submit the updated version for review. Later draft changes do not automatically update a version you already submitted. Follow any organiser feedback shown under Your projects.

Before you finish

Your final checklist

1. Your project title and public name are correct.
2. Your text explains the work and what visitors can do.
3. Your image has permission, alternative text and a credit.
4. Your public links open and your latest changes are saved.
5. You have checked Preview and chosen **Submit for review**.
6. You can open the submitted version and see its status.

What the different states mean

Draft: private saved work.

Submitted: that version is awaiting checks or review.

Approved: awaiting a separate publication step.

Published: the public release has been verified.

If something goes wrong

Expired or missing code: request a replacement on the sign-in page. Check your invited address and spam folder. If you still cannot sign in, contact the organiser. Never share your code.

Save failed: keep the tab open, follow any sign-in prompt and try **Save draft** again. Unsaved text can be lost if you close the tab.

A newer draft exists: compare it before reloading; reloading discards your unsaved text.

Checks queued or failed: open the submitted version, read the message and use **Retry checks** if offered for a delivery failure. See step 7 on page 6.

Need help? Email timothiellim@gmail.com. Include your project title and the error message, but never a sign-in code.

If you need longer than 29 September, let the organiser know. Editing stays available after this soft deadline, ahead of the 30 September meetup.
